

# Virtual HP-IL Concept

How to connect devices without a  
central loop?

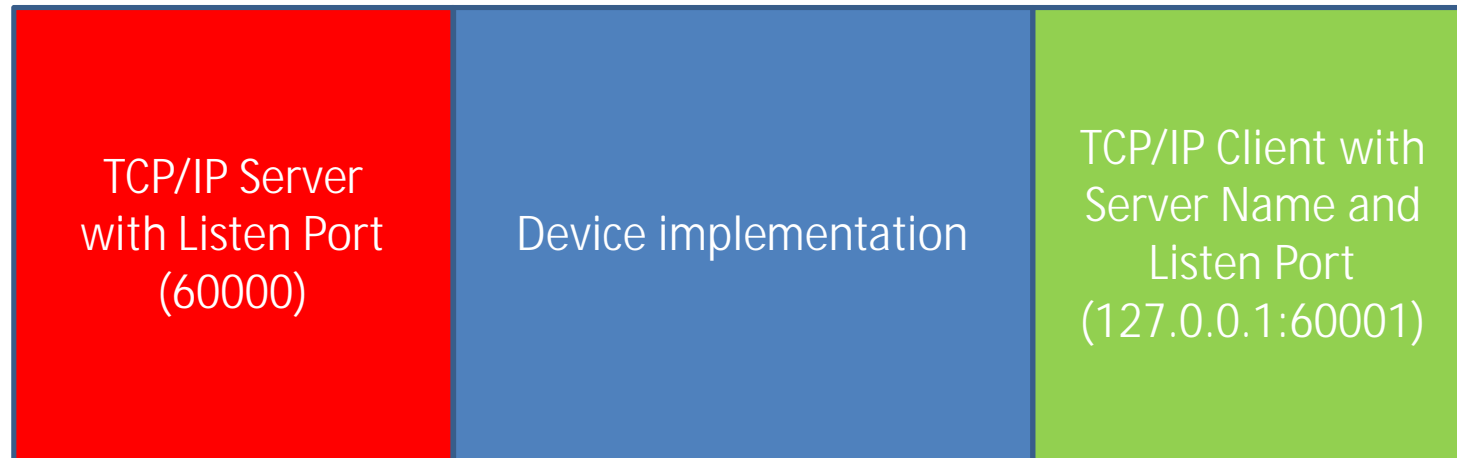

# Classic Loop like in Emu71/DOS

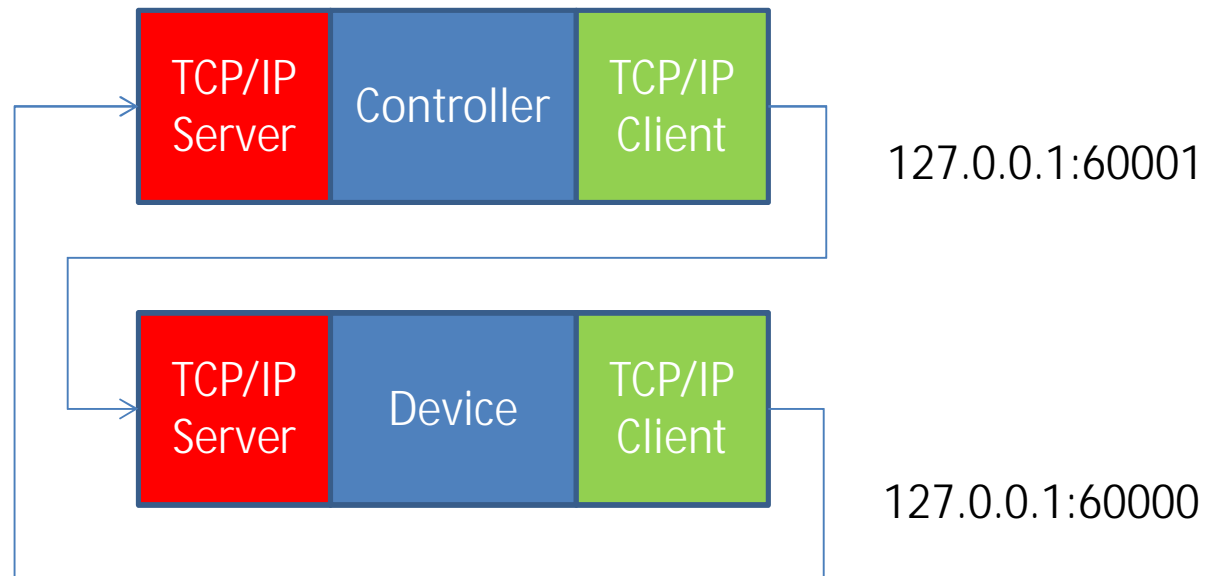

# A Classic Loop with TCP/IP

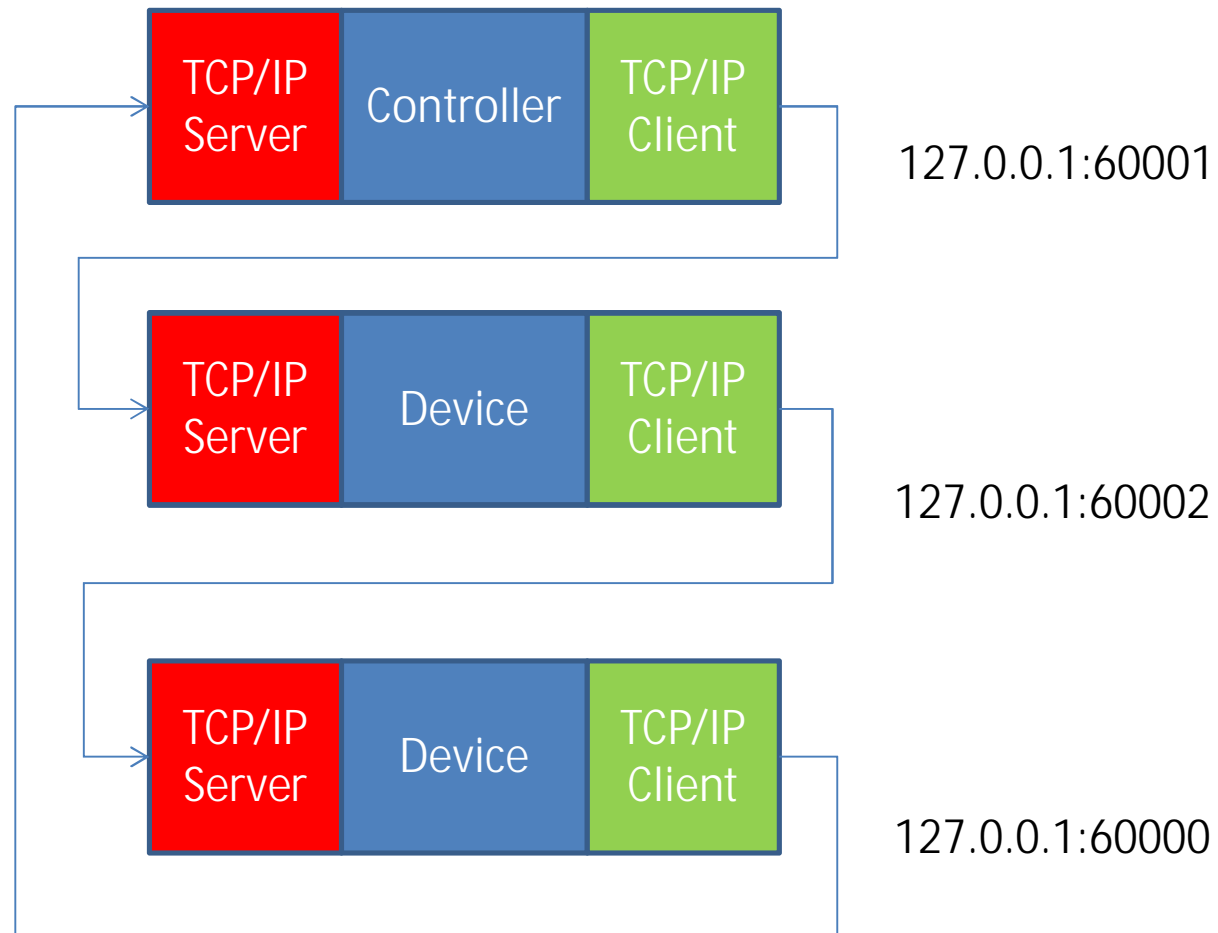

# My Virtual Loop Device with TCP/IP interface

# My Virtual Loop with 1 device

# My Virtual Loop with 2 device

# Virtual HP-IL compatible software

- **Emu71/Win**, a HP-71B emulator

- **ILPer**, a generic printer and floppy disc simulator

- **ILVideo**, a HP-82163A Video device simulation

- **ILVideo80**, a HP-92198 Video device simulation

- **ILDosLink**, a generic interface device to send and receive binary data

- **ILScope**, a HP-IL frame analyser

- **ILPilBox**, a bridge between the PIL-Box hardware and Virtual HP-IL

- **ILCtrl**, a HP-IL controller demonstrator
